2017 Distribution of Indiana Licensed Professional Geologists

The Indiana Board of Licensure for Professional Geologists actively maintains a database of Indiana License Professional Geologists (LPGs) on its website: http://igs.indiana.edu/LPG/. The LPG database is updated at least weekly as new geologists are licensed and as the status of those who are licensed changes (e.g., current, expired or deceased.

As of April 7, 2017, there were 1,285 active licensees in the LPG database, 430 of whom (33%) reside in Indiana. Nearly as many (396 or 31%) reside in the immediately adjacent state of Illinois, Kentucky, Michigan and Ohio. The balance of them reside elsewhere in the United States (453) in the Armed Forces (1) or in Canada or Chile (5).

The following two maps show the distribution of LPGs in Indiana’s 92 counties and the distribution of LPGs throughout the United States and elsewhere.

The Board gratefully acknowledges the assistance of Indiana Geological Survey Cartographic Specialist Matt Johnson, who created the maps from the data that it provided.
Number of Indiana Licensed Professional Geologists per County

Data from April 2017
Number of Indiana Licensed Professional Geologists per State

Other Indiana Licensed Professional Geologists
- Alaska: 2
- Hawaii: 1
- Armed Forces: 1
- Alberta: 1
- British Columbia: 1
- Ontario: 2
- Chile: 1
